

# WITH YOUR HELP, IT'S HERE!

For the last two years, Lift Up Uganda (LUU) supporters have come together to fundraise for a motorcycle ambulance for the St. Nektarios Health Center. As mentioned in the [Winter 2021 LUU Newsletter](#), the ambulance manufacturer, unfortunately, closed permanently in early 2021. Fulfilling the request and dream of Fr. George, the Health Center staff, and the community, LUU was able to purchase a van. This van was converted to an ambulance and equipped with materials needed to transport patients.

**The photo below is the actual ambulance that LUU supporters were able to provide to the St. Nektarios Health Center.** Without your continued support, this ambulance would not have been possible. In addition, one driver has already been hired to provide medical transports, and a small garage was built at the Health Center for this ambulance. Every donation was put to use to make this addition to the St. Nektarios Health Center possible.

This ambulance:

- Will provide immediate service for Mothers and Babies who develop unexpected complications during delivery to be transferred to Gulu hospitals.
- Will make emergent medical transport for any patients needing hospitalization and advanced care.
- Will provide the ability to provide transportation to and from the St Nektarios Health Center for patients from surrounding villages.
- Has met all Ministry of Health requirements and licensure.

To see [a video of the ambulance in action](#) and read more about Lift Up Uganda's mission of providing **Health** and **Education** to the people of northern Uganda, we encourage you to visit the [LUU website](#).

Thank you to all of our supporters for making this dream a reality.

Thank  
you!
